

6G-VERSUS

6G Vertical Trials for Sustainability

6G PILOTS

Greek Pilot

Collaborative robotics towards an early wildfire detection concept

Spanish Pilot

Enabling remote field management through teleoperation and sensor equipped vehicles

French Pilot

Use Case 1: Sewer network monitoring
Use Case 2: Smart watering in green space

Portuguese Pilot

Monitoring capabilities for environmental quality and safety levels in ports

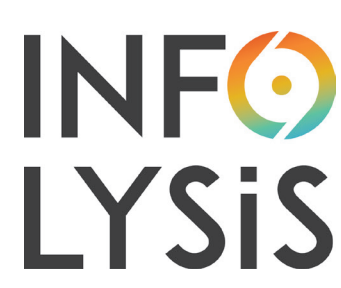

Bulgarian Pilot

AI-data driven monitoring and control of distributed renewable sources

Finnish Pilot

Sustainable operations for a remote (arctic circle) base station (offgrid) with renewable energy sources

Co-funded by
the European Union

6G SNS

smart-networks.europa.eu

6G-VERSUS has received funding from the Smart Networks and Services Joint Undertaking (SNS JU) under the European Union's Horizon Europe research and innovation programme under Grant Agreement No 101192633
